EXPERIENCE

QAD Inc. – AI/Agent Engineer

Dec 2025 – Present

- Architected and maintained LLM-powered agentic workflows for supply chain automation, resolving 55+ production tickets across 5 Jira boards spanning agent development, bug fixes, and system design.
- Debugged and hardened ERP agents (PO creation, production order close, file mapping) – fixed critical issues like bulk-action safety guards, missing API response fields, and inaccurate cost analysis feedback for enterprise QAD Adaptive ERP customers.
- Built a **JQ-based schema query tool** for the file mapping agent, replacing 2.5MB inline schema injection with on-demand tool calls – reducing token usage per batch by over 80%.
- Designed automated regression pipelines for agent quality validation, including eval suites comparing mapping accuracy between inline-schema and tool-based approaches.
- Replaced Lambda-based invocations with direct HTTP APIs for alert creation, improving cross-environment reliability (dev, preprod, prod) and eliminating deployment blockers.

Kavida AI (Acquired by QAD) – Junior Data Scientist

Aug 2025 – Nov 2025

- Migrated the Agent Maxi setup from LangChain chains to native Python with LiteLLM, achieving streaming SSE for multi-agent reasoning/thoughts and reducing framework overhead.
- Implemented **Langfuse observability** for hierarchical LLM tracing without LangChain dependency, and added **SigNoz tracing** for route-level API observability in production.
- Migrated 3 business-critical services (procurement change monitor, RFQ monitor, quotation change monitor) from scriptr-worker into KavidaAgentUX monorepo.
- Developed AI-powered news article scraping pipeline for supplier risk intelligence.
- Migrated copilot to uv package manager and implemented authentication and conversation thread management.

TECHNICAL SKILLS

- Languages:** Python, TypeScript, JavaScript, Go, C++
- AI/ML:** Prompt Engineering, Agentic Workflows, LangChain, LiteLLM, OpenAI API, Gemini API, Pydantic, JQ
- Observability:** Langfuse, SigNoz, Structured Logging, LLM Evaluation Frameworks
- Databases:** MongoDB, PostgreSQL, MySQL, DynamoDB
- Cloud & Infra:** AWS (Lambda, SQS, EC2, ECR, RDS, S3), Docker, CI/CD, NGINX, GitHub Actions
- Frameworks:** FastAPI, Express.js, Next.js, Node.js, REST APIs, SSE, Async Python (asyncio)
- Practices:** Agile/Scrum, Microservices, Strategy Pattern, Domain-Driven Design, Test-Driven Development

PROJECTS

LaResume

Live Link — GitHub

- Developed an ATS-friendly resume builder with LaTeX export and PDF generation
- Deployed to AWS EC2 with Docker/ECR, GitHub Actions CI/CD, and separate dev/prod environments.
- Gained 2900+ signups, 4000+ resumes created, and 190+ GitHub stars.

Quotica

Live Link — GitHub

- Built a full-stack AI image generation app using OpenAI and Gemini APIs.
- Implemented context-aware chat with conversational memory across prompts.
- Integrated webhook-based payments for premium features.

EDUCATION

Techno Main Salt Lake

Kolkata, West Bengal, India

Bachelor of Technology in Computer Science and Business Systems; CGPA: 8.55

Oct. 2021 – May 2025

Guru Tegh Bahadur Public School

Durgapur, West Bengal, India

Senior Secondary (XII); Percentage: 90.8%

2020 - 2021

Guru Tegh Bahadur Public School

Durgapur, West Bengal, India

Higher Secondary (X); Percentage: 93.6%

2018 - 2019

HONORS & AWARDS

Achieved a **2178 rating (Guardian)** and ranked in the top 1% of Leetcode users. [Profile Link](#)

Reached a **1917 rating (4 star)** on CodeChef, ranking among the top 5000 globally. [Profile Link](#)

Solved over 2500 data structures and algorithms problems across multiple coding platforms.

Selected for **Amazon Machine Learning Summer School 2024**. [Link](#)

Qualified for Round 2 in the **Meta Hacker Cup 2024**. [Link](#)
